Epidemiology of HIV Among Blacks and Hispanics Reported in Florida, Through 2013

Florida Department of Health
HIV/AIDS Section
Division of Disease Control and Health Protection
Annual data trends as of 12/31/2013
Living (Prevalence) data as of 06/30/2014
Note: Over the past ten years, black men represented the highest proportion (> 35%) of male HIV infection cases by race/ethnicity. From 2004 to 2013, the percentage of male HIV cases increased among Hispanics by 7 percentage points. In contrast, the HIV cases decreased by 1 percentage point among whites and 5 percentage points among blacks over the same time period.

*Other includes American Indian/Alaska Native, Asian/Pacific Islander, and multi-racial.
Note: HIV case disparities are more evident among women than men. For the past ten years, black women represented over 63% of the cases each year. From 2004 to 2013, the proportion of cases by race/ethnicity among women remained fairly stable.

*Other includes American Indian/Alaska Native, Asian/Pacific Islander, and multi-racial.
Adult HIV Infection and AIDS Cases Reported in 2013 and Population, by Race/Ethnicity, Florida

HIV
N=5,916

2013 Florida*
Population Estimates
N=16,430,458

AIDS
N=3,279

Note: Blacks comprise only 15% of the adult population in Florida, but represent 43% of adult HIV infection cases and 51% of adult AIDS cases reported in 2013. Similarly, Hispanics comprise 22% of Florida’s adult population, yet account for 26% of the HIV infection cases and 21% of the AIDS cases.

*Source: Population estimates are provided by Florida CHARTS as of 06/03/2014.
**Other includes Asian/Pacific Islanders, Native Alaskans/American Indians and multi-racial individuals.
Adult HIV Infection Cases, by Sex and Race/Ethnicity, Reported in 2013, Florida

Males
N=4,542

Females
N=1,374

Note: In this snapshot of 2013, HIV cases by race/ethnicity among males is more evenly split compared to HIV cases among females where blacks are over-represented, accounting for 66% of adult cases among women.
*Other includes Asian/Pacific Islanders, Native Alaskans/American Indians and mixed races.

Case Rates* of Adults Living with HIV Disease, by Sex and Race/Ethnicity, Reported through 2013, Florida

**Note:** In 2013, among black males, the case rate is nearly 5 times higher than the rate among white males. Among black females, the case rate is nearly 18-fold greater than the rate among white females. Among Hispanic females, the case rate is nearly 2 times higher than the rate among their white counterparts. The case rate among Hispanic males is slightly lower to the rate among their white counterparts.

*Source: Population estimates are provided by Florida CHARTS as of 06/03/2014.

**Other includes Asian/Pacific Islanders, Native Alaskans/American Indians and Multi-racial individuals.
One-In-Statement for Adults

There were 101,977 reported adult (age 13+) Persons Living with HIV Disease (PLWHAs) in Florida through 2013.

1 in 189 adult Floridians are known to be currently living with HIV infection.

By Race/Ethnicity (adults age 13+):
• 1 in 366 whites are currently living with HIV infection
• 1 in 61 blacks are currently living with HIV infection
• 1 in 215 Hispanics are currently living with HIV infection

Data as of 06/30/2014
Hispanic Adults Living with HIV Disease, by Sex and Current Age Group, Reported through 2013, Florida

Note: Hispanic males living with HIV disease have a slightly higher proportion of cases who are currently 40 years of age or older (74%), compared with Hispanic females 40 years of age and older living with HIV disease (73%).

Leading Causes of Death Among Blacks
25-44 Years Old by Sex, 2013, Florida

**Black Men**
HIV is 5th leading cause

**Black Women**
HIV is the 2nd leading cause
Underlying Factors Affecting HIV/AIDS Disparities

- Amount of HIV already in the community
- Late diagnosis of HIV or AIDS*
- Access to/acceptance of care*
- Stigma, denial*,
- Discrimination, homophobia*
- HIV/AIDS complacency*
- Poverty and unemployment

*Factors that HIV/AIDS initiatives can impact.
• Minorities are at high risk for HIV infection...
  • NOT because of their race
  • NOT because of their ethnicity...

• But BECAUSE of risk behaviors they may engage in.

IT’S NOT WHO YOU ARE, BUT WHAT YOU DO.
