

PUBLIC HEALTH DATA BRIEF

BREAST CANCER IN VOLUSIA COUNTY

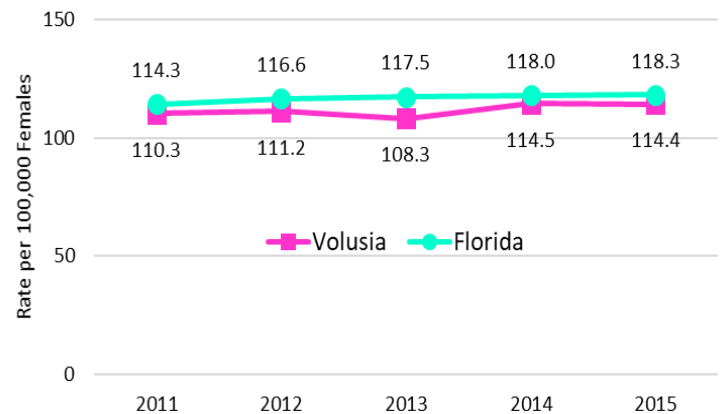

The most common form of cancer in women is breast cancer, according to the Centers for Disease Control and Prevention (CDC). Nationally, about 237,000 women and 2,100 men are diagnosed with breast cancer each year. Approximately, 41,000 women and 450 men die annually from breast cancer in the U.S., reported CDC. Healthy People 2020 (HP2020) has set an age-adjusted rate of 20.7 breast cancer deaths per 100,000 females as the national target. The U.S. age-adjusted breast cancer death rate was 20.1 in 2016. Florida's rate was slightly lower with 19 deaths per 100,000 females. Volusia County's breast cancer death rate matched the HP2020 target at 20.7 per 100,000 females in 2017.

**Breast Cancer Age-adjusted Death Rates
Volusia County and Florida, 2013-2017**

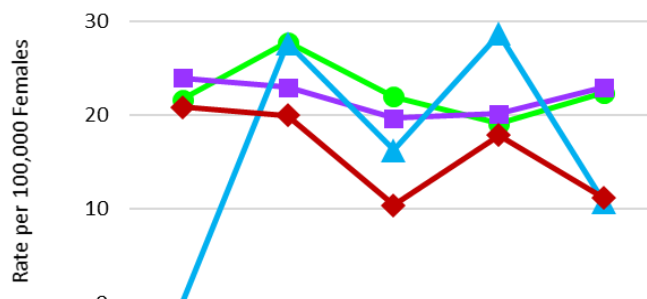

- ↑ Breast cancer age-adjusted death rates among females in Volusia County decreased by 10 percent from 2013 to 2017.
- ↑ Volusia County's breast cancer death rate equaled or was lower than the HP2020 target in three of the five year period.

**Breast Cancer Age-adjusted Incidence Rates
Volusia County and Florida, 2011-2015**

- ↑ The age-adjusted incidence (newly diagnosed cases) rate of breast cancer in Volusia County rose by four percent from 2011 to 2015
- ↑ Volusia County's incidence rate was consistently lower than Florida's rate from 2011 to 2015.

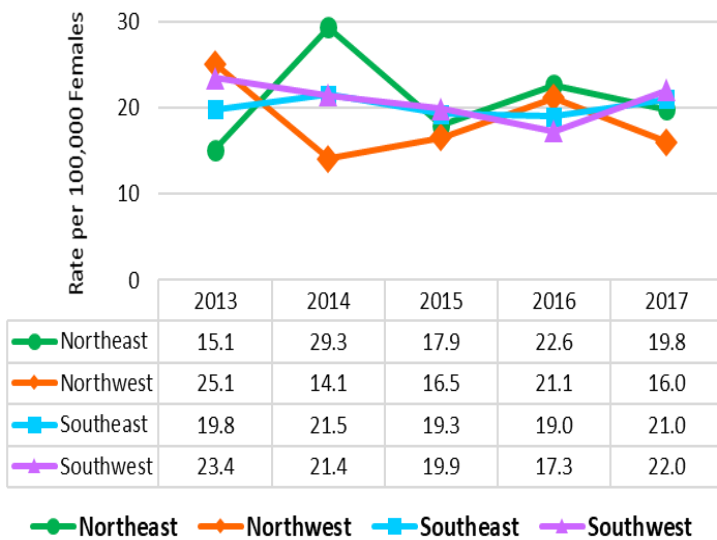

Breast Cancer Age-adjusted Death Rates by Race/Ethnicity, Volusia County, 2013-2017

- ↩ The breast cancer death rate for black women rose by three percent, while the rate for white women decreased by four percent from 2013 to 2017.
- ↩ Breast cancer death rates decreased the most (46.4%) for Hispanic women from 2013 to 2017.

NOTE: Age-adjusting: The frequency with which health events occur is almost always related to age. The age-adjusted rate eliminates the effect of the underlying age distribution of the population, allowing for comparisons between populations regardless of their age structure.

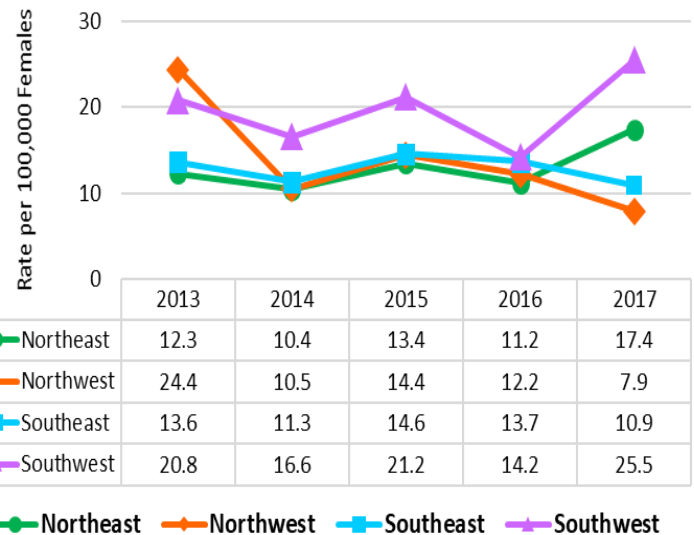

Breast Cancer Age-adjusted Death Rates by Quadrant, Volusia County, 2013-2017

↑ The western quadrants had decreased in breast cancer deaths from 2013 to 2017 with the northwest quadrant having the largest decrease (36.3%) in deaths due to breast cancer.

↓ Hospitalization rates due to breast cancer increased for the northeast and southwest quadrants by 42 and 23 percent respectively, while decreasing for the northwest and southeast quadrants by 68 and 20 percent respectively from 2013 to 2017.

Breast Cancer Hospitalization Age-adjusted Rates by Quadrant, Volusia County, 2013-2017

Percentage of Breast Cancer Hospitalizations and Deaths by Race/Ethnicity, Volusia County, 2013-2017

Race/Ethnicity	Measure	2013	2014	2015	2016	2017
Black Women	% Population	10.5%	10.5%	10.5%	10.5%	10.5%
	% Hospitalizations	15.5%	11.1%	7.7%	6.5%	9.8%
	% Deaths	5.3%	7.1%	7.3%	5.5%	8.1%
White Women	% Population	74.4%	74.3%	73.8%	73.3%	72.8%
	% Hospitalizations	78.9%	80.0%	84.6%	84.8%	68.9%
	% Deaths	88.3%	84.7%	86.6%	86.8%	86.0%
Other Women	% Population	3.4%	3.5%	3.6%	3.7%	3.8%
	% Hospitalizations	0.0%	0.0%	1.9%	2.2%	4.9%
	% Deaths	0.0%	2.0%	2.4%	2.2%	1.2%
Hispanic Women	% Population	11.7%	11.7%	12.1%	12.4%	12.9%
	% Hospitalizations	5.6%	8.9%	5.8%	6.5%	16.4%
	% Deaths	6.4%	6.1%	3.7%	5.5%	4.7%

← While white women represented 74.4 percent of the female population in Volusia County in 2013, the percentage of deaths (88.3%) and hospitalizations (78.9%) due to breast cancer was higher and remained higher than the population percentage in each of the following four years.
