

SEPTIC UPGRADE INCENTIVE PROGRAM COMING SOON!

To improve water quality and protect Florida's outstanding springs, the Florida Department of Environmental Protection has created an incentive program that encourages the enhancement of conventional septic systems by adding advanced features to reduce nitrogen pollution. This incentive program is designed to provide certified installers and licensed plumbers with up to \$10,000 after the installation of enhanced nitrogen-reducing features to existing septic systems located in targeted areas within eligible counties*. Participating in this program will help protect the environment by reducing excessive nutrients in Florida's waterways.

As a septic installer or plumber, you may qualify to receive an incentive if:

- You are an installer of enhanced nitrogen-reducing features or systems.**
- You are a septic installer certified by the Florida Department of Health or a plumber licensed by the Florida Department of Business and Professional Regulation.**
- The septic system is located in targeted areas within one of these counties*:**

Leon	Hernando	Orange
Wakulla	Marion	Seminole
Citrus	Volusia	Pasco

*To learn more about targeted areas within these counties, visit FloridaDEP.gov/PFAMap
