Additional Comments:	
NOTE: In most cases, repaired water mains should be chlorinated and/or flushed prior to being placed back into service. It may be advisable to temporarily elevate disinfection residuals. Except for larger systems, BWN can be rescinded after collecting 4 satisfactory bacteria (2 samples on 2 consecutive days.)	
Please E-mail or FAX a BWN ‘RESCISSION NOTICE’ <u>ASAP</u> following two days of satisfactory Total Coliform samples. The laboratory reports for these samples can be submitted at this time or with MOR’s.
